

***Global Connectivity, Knowledge and Innovation for
Sustainability and Growth: New Paradigms of Theory and Practice***

CALL FOR POSTERS

June 21, 2016

Montclair, NJ, 07043

<http://www.sgbed.com/>

Nature and Scope of the Conference:

The world is becoming increasingly interconnected across all fronts at an unprecedented pace; it is deemed that networks, knowledge and innovation, and entrepreneurship drive growth and development. The rise of emerging markets and growth of global supply chains are attributed to globalization and ICT; nations and firms continue to form strategic levers using the power of comparative advantage; and human capital worldwide is becoming more mobile and engaged virtually despite the national boundaries. The developments have also caused dramatic structural and organizational changes and disruption of traditional businesses, and job markets. Global investments in commodities and indiscriminate exploitation of natural resources affected the sustainability of global ecosystems. Equal access to education, knowledge and health are also under the microscope. The challenges of rising inequalities in wealth and income, economic stagnation, unemployment, and the impact of globalization have also taken the center stage of public discourse. These trends bring heightened levels of responsibility to business, institutions and society. In view of the strategic importance of these challenges the 14th International Business conference invites posters on, but not limited to, Natural Resource Management and Economics, Corporate Social Responsibility, Environmental Management, and Sustainability.

Monetary awards will be given to outstanding poster presentations.

Poster Session Abstract **Submission Deadline April 30**

Poster Abstract Submission Guidelines:

- The abstract must primarily report on new work within the field of Natural Resource Management and Economics, Corporate Social Responsibility, Environmental Management, or Sustainability. Reviews of previous work are not permissible for contributed presentations.
- Limit the abstract to 2500 characters (approx. 400 words).
- Report specific results of the study and their implications; the results may be preliminary. Abstracts without explicitly stated results will be rejected. It is understandable that abstracts that describe non-traditional work may lack quantitative data; however, it is still expected that the abstract will address specific questions and have a “take-home message” with specific findings.
- Abstracts must be clear. Poorly written abstracts will be returned or rejected if suggested changes are not incorporated.
- Abstracts must be written in English and must follow standard grammar and punctuation rules. Poster presentations must be in English. Abstracts that do not meet the standards will be rejected.
- For every author listed, their name, institution(s), and email ids are required.
- Missing coauthors is a common issue. Please check to make sure that co-author(s) are included.
- Any author can be designated as the presenting author. The presenting author’s name should appear in bold text.
- Please indicate the corresponding author by placing the corresponding author’s name in italics. In order to receive notifications from us, it is important to make sure the correct person is indicated and his/her email is entered correctly.

If you are unsure if your presentation meets our guidelines, please ask us. We would rather talk to you about any issues in advance than send you a rejection notice in May.

Please submit your poster abstracts here.
